

ONF International

Sow the future: invest in forests

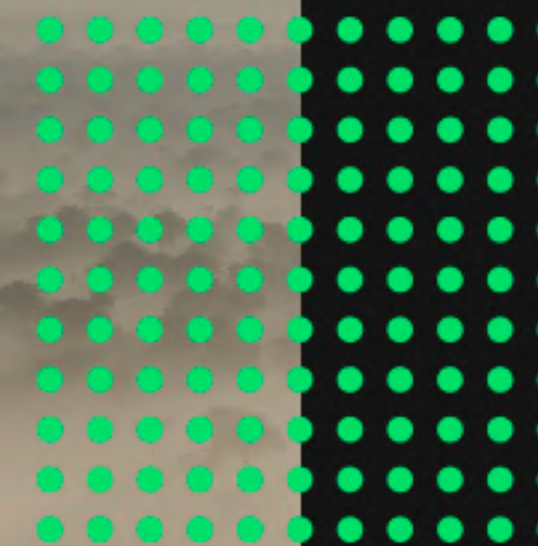

Forests
are becoming
a cornerstone
of sustainable
performance:
climate,
biodiversity,
and communities.

Faced with the climate emergency and the growing need to meet regulatory obligations responsibly, companies, organizations, and institutions are looking for **reliable, measurable, and long-term solutions.**

→ Contribute to
the sustainable
development of
territories

→ Support the local
communities who
depend on them

→ Achieve
your carbon
neutrality goals.

→ Strengthen the
credibility of your
environmental
commitments.

Today, forests represent the most powerful natural lever to address these future challenges.

Today, forests represent the most powerful natural lever to address these future challenges.

With **ONF International**, you benefit from world-class expertise to make forests a central pillar of your climate strategy.

1

Why integrate forests into your strategy?

Because forests play *a key role* in the ecological transition

They naturally capture
and store carbon

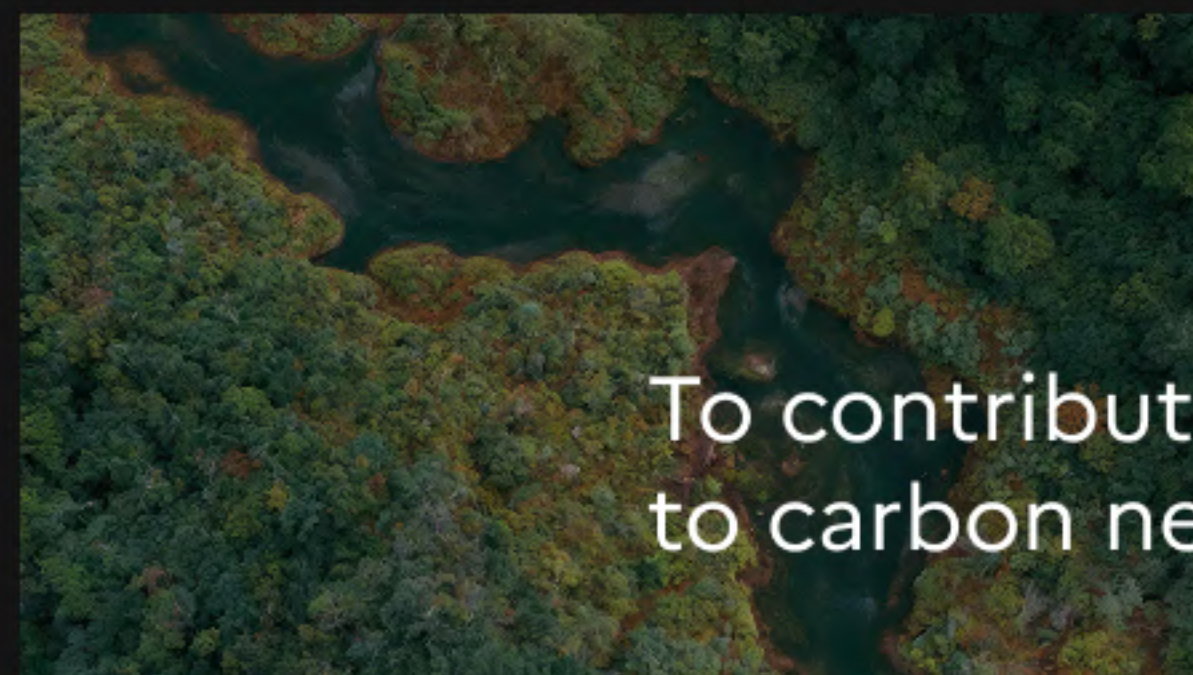

They protect biodiversity

They strengthen climate
resilience in territories by
supporting the communities
that live there

Because forests
also represent
*a strategic
opportunity*

To contribute concretely
to carbon neutrality

To secure credible carbon
offset projects

To give depth and meaning
to your CSR commitments

To align with the expectations
of your stakeholders: investors,
clients, and employees

Why work with ONF International?

ONF International is the
international subsidiary of the
French National Forest Office

ONF International is the
international subsidiary of the
French National Forest Office

A historic reference in sustainable
management of public forests in France

Office National des Forêts

Accelerate your forest strategy and climate impact through complementary services combining science, technology, and territorial engagement.

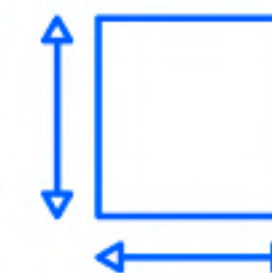

1 Sustainable ecosystem management

We help you design
robust strategies to
preserve and enhance
natural resources

Forest
policies

Management
plans

Risk management

Impact
assessments

Forest inventories

2

Tailor-made forest carbon projects

We design and
implement your
forest project
*“from seed to
carbon credit.”*

Net Zero
strategy

As well as the enhancement of
environmental and social co-benefits.

Project design and certification
according to the most demanding
international standards

Financial
structuring

Operational
implementation

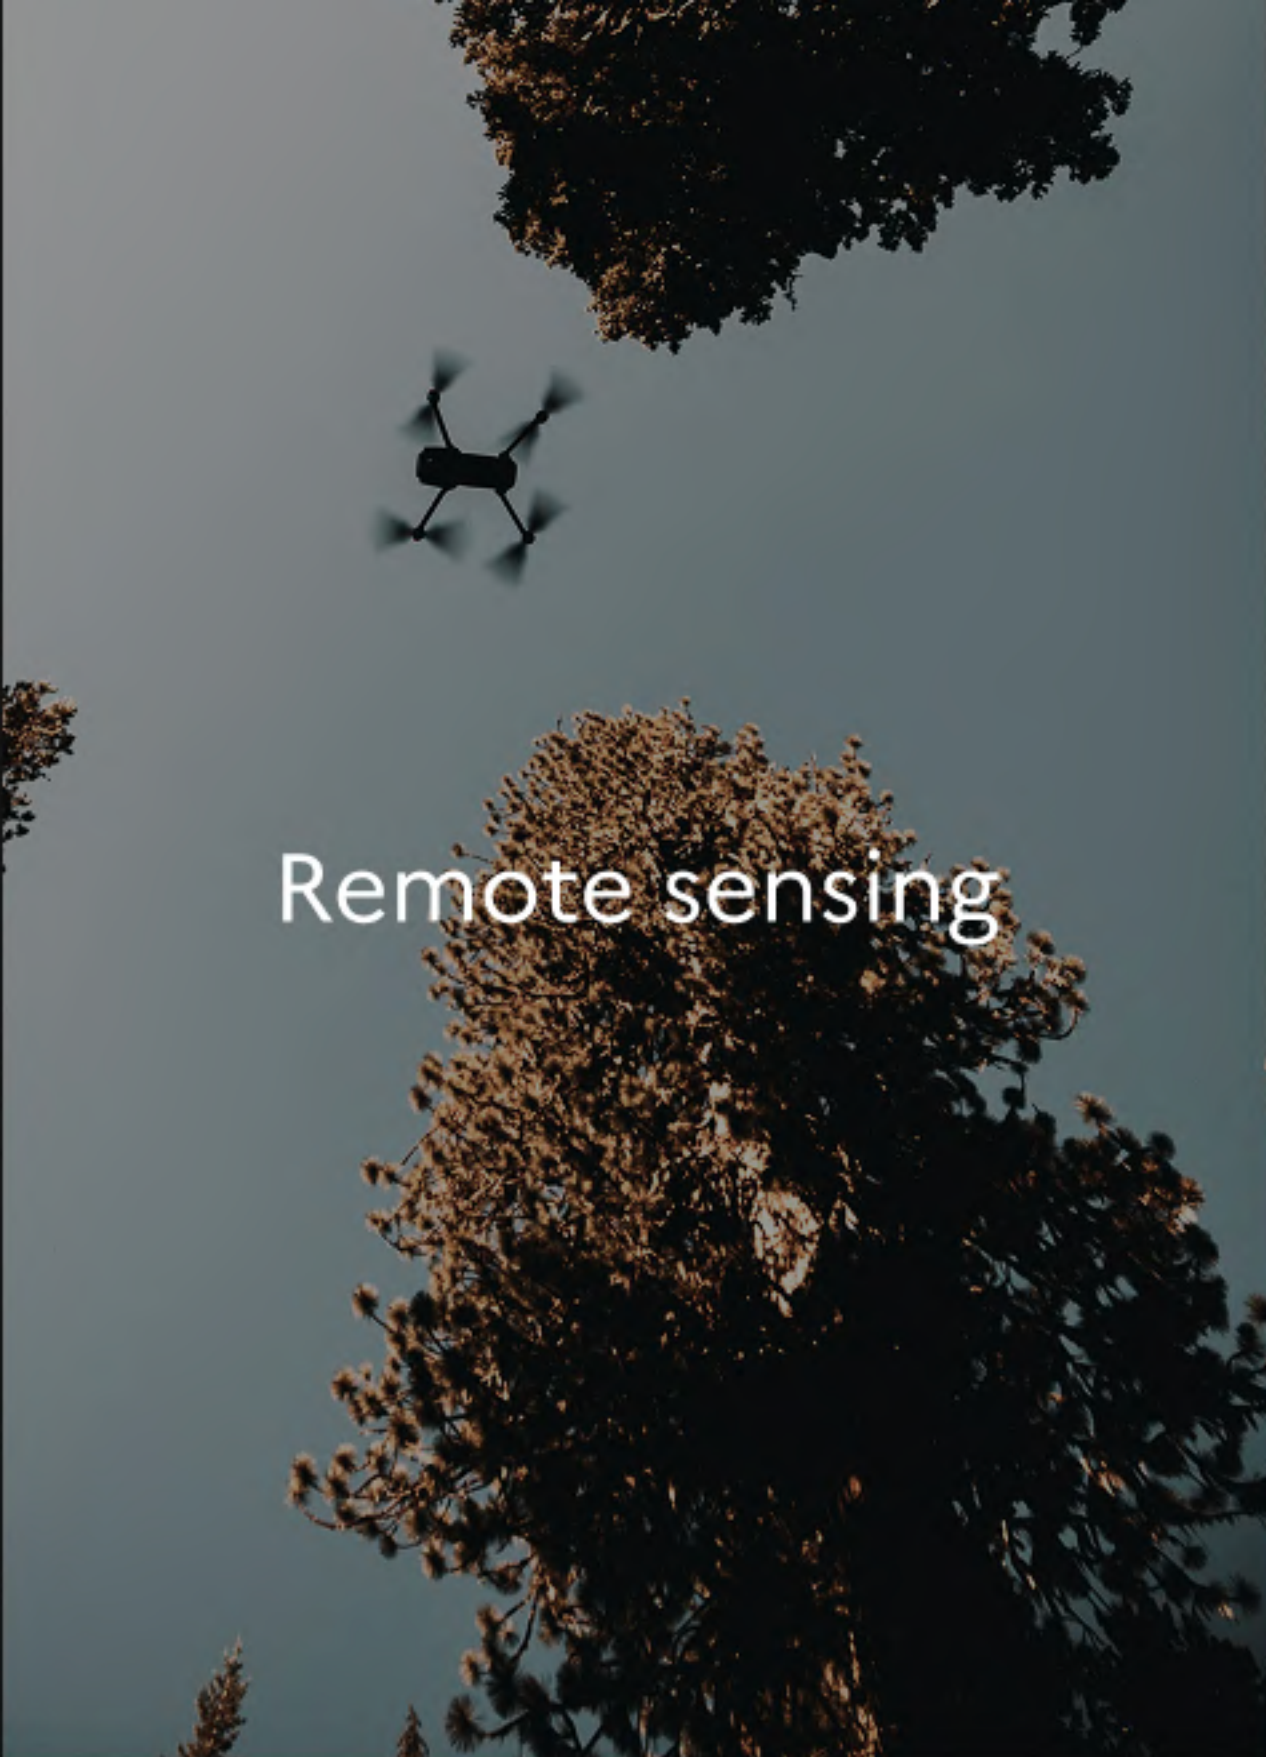

Advanced technologies & geospatial analysis

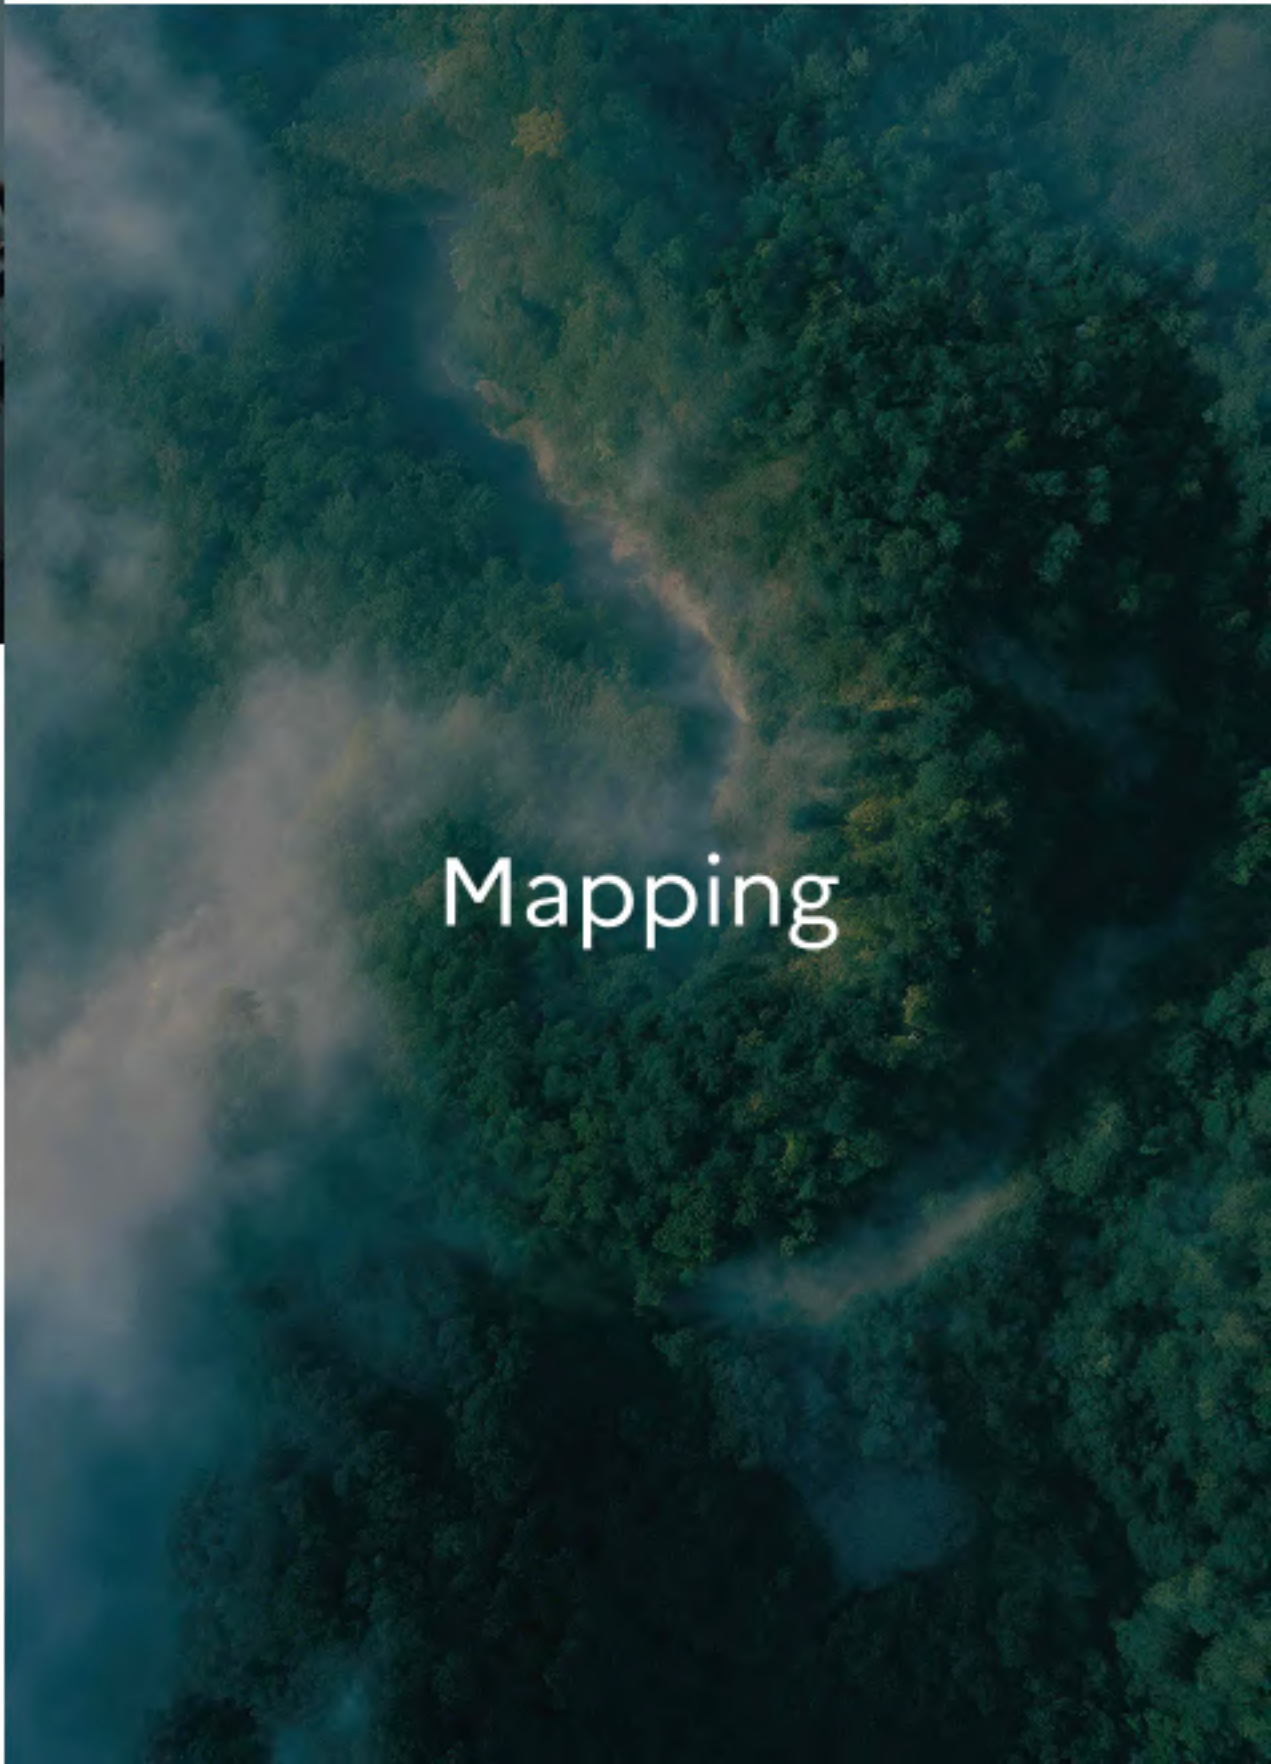

We provide
innovative tools
to manage *your*
projects *with*
precision

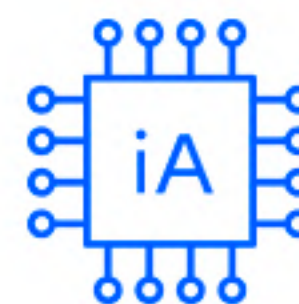

Remote sensing

Digital
platforms

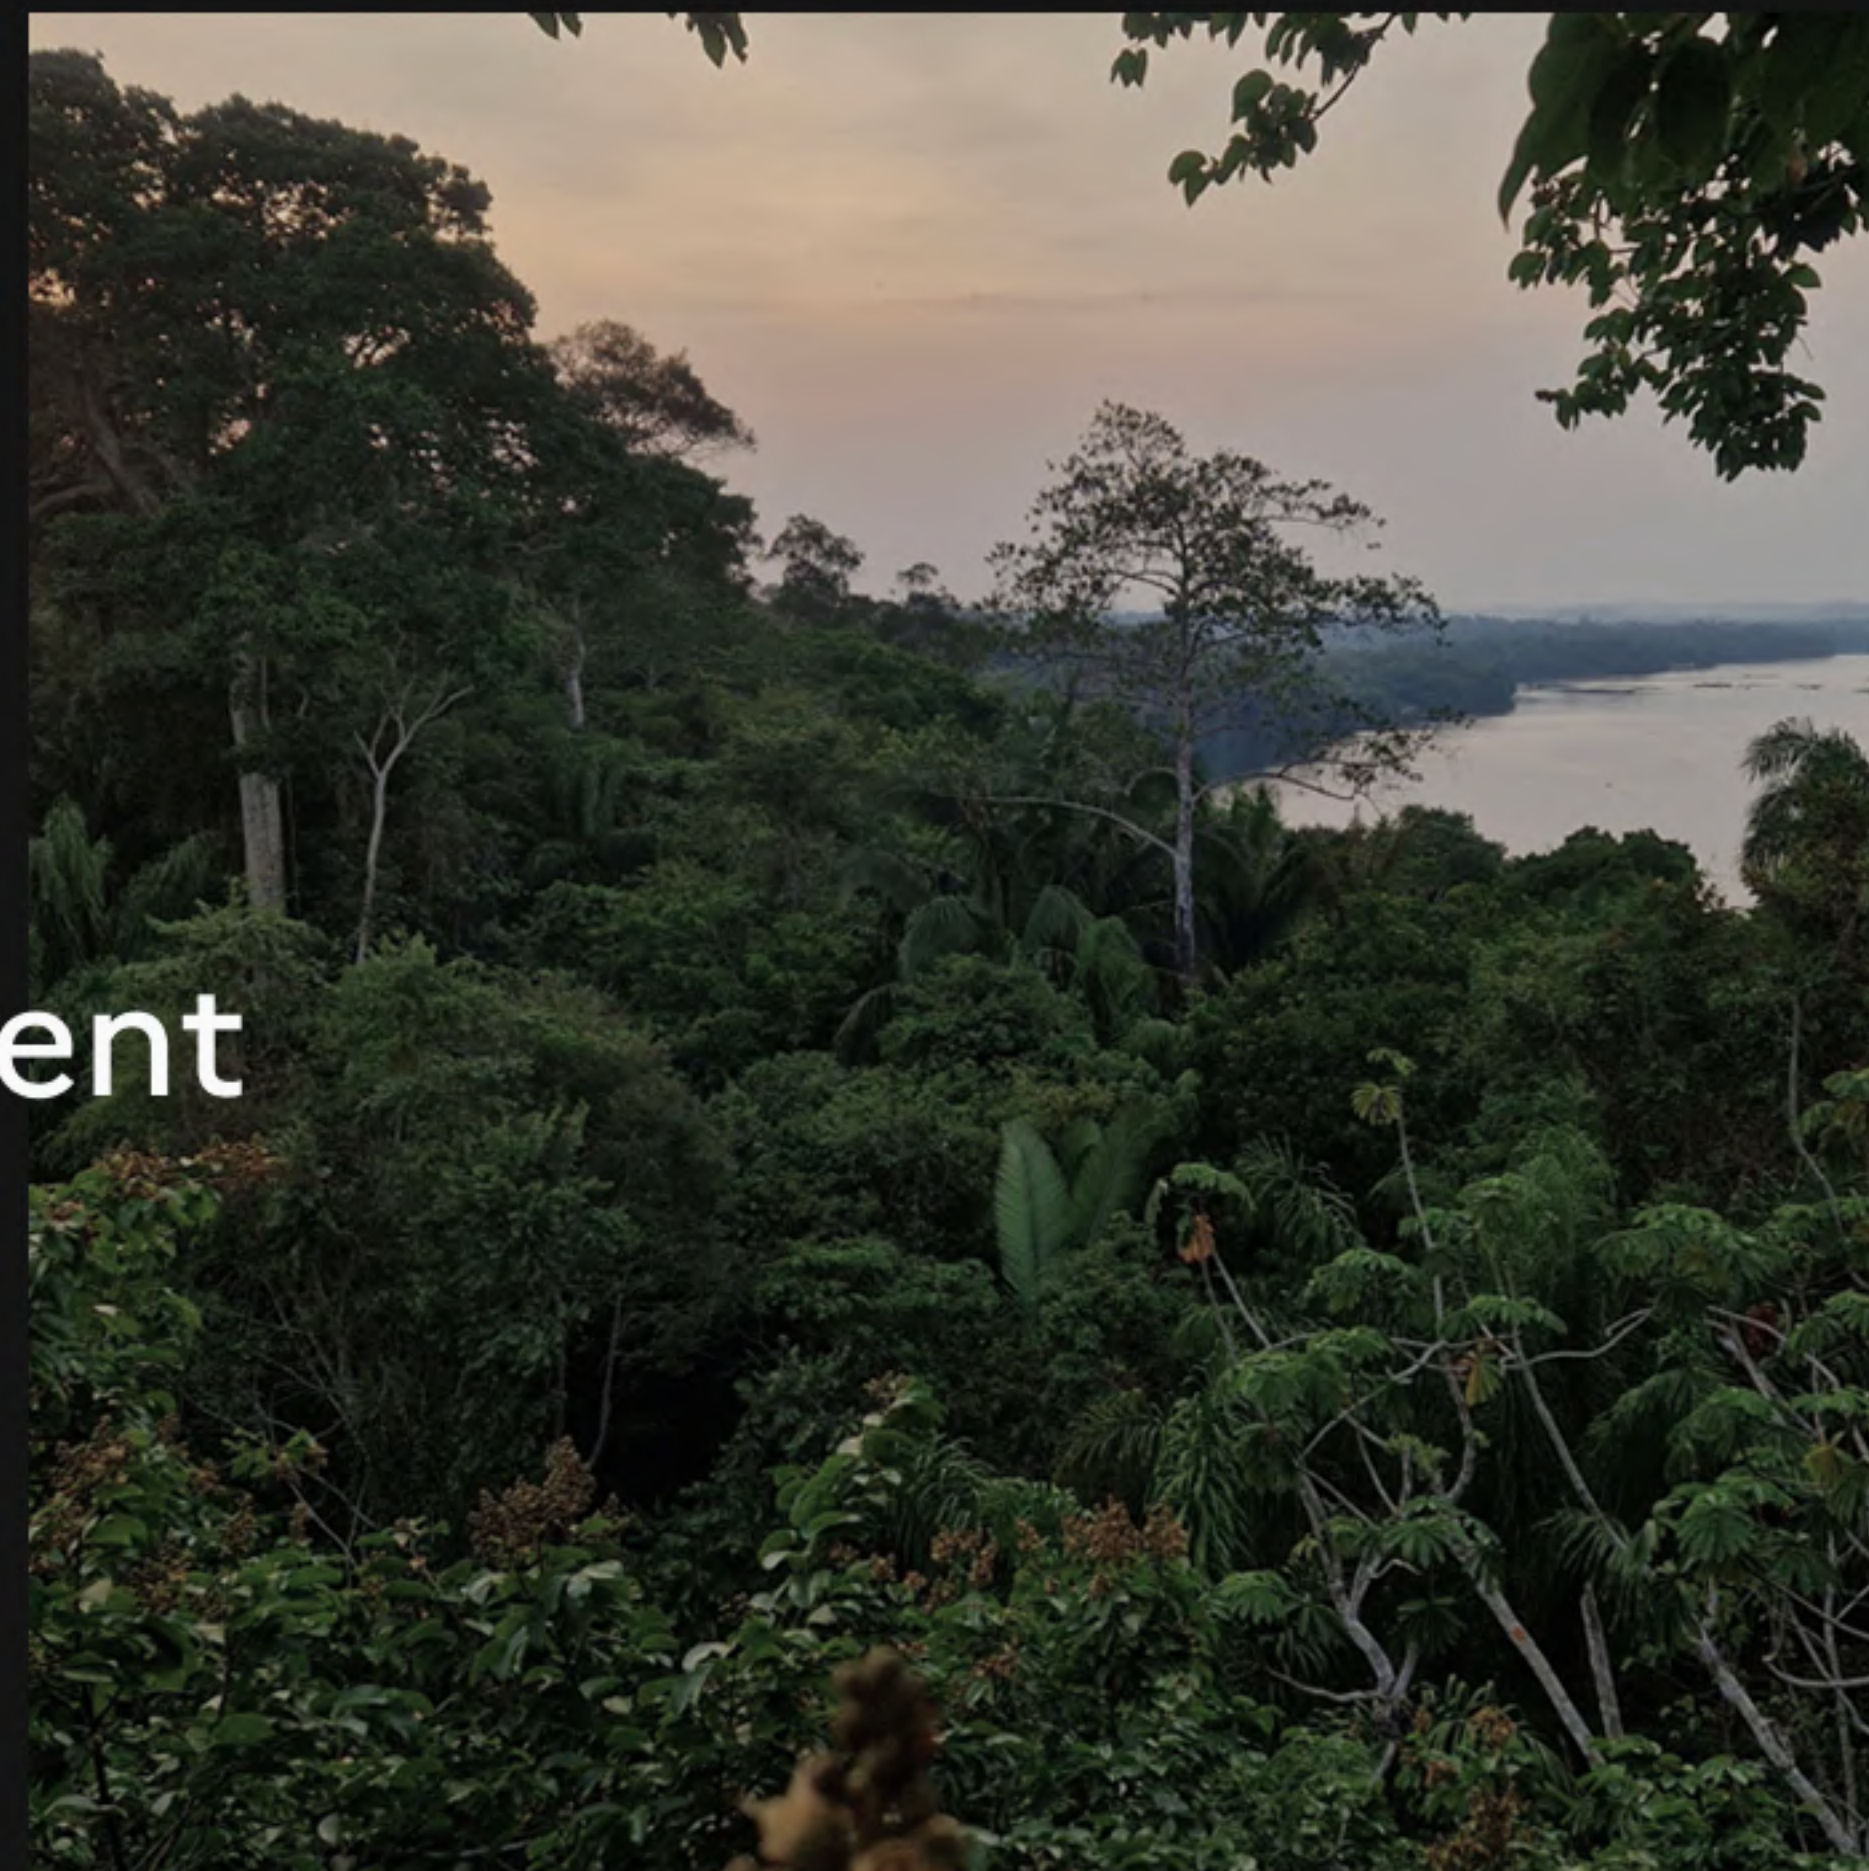

Mapping

Predictive AI

4 Territorial development

We support the
ecological transition
of territories through
integrated solutions

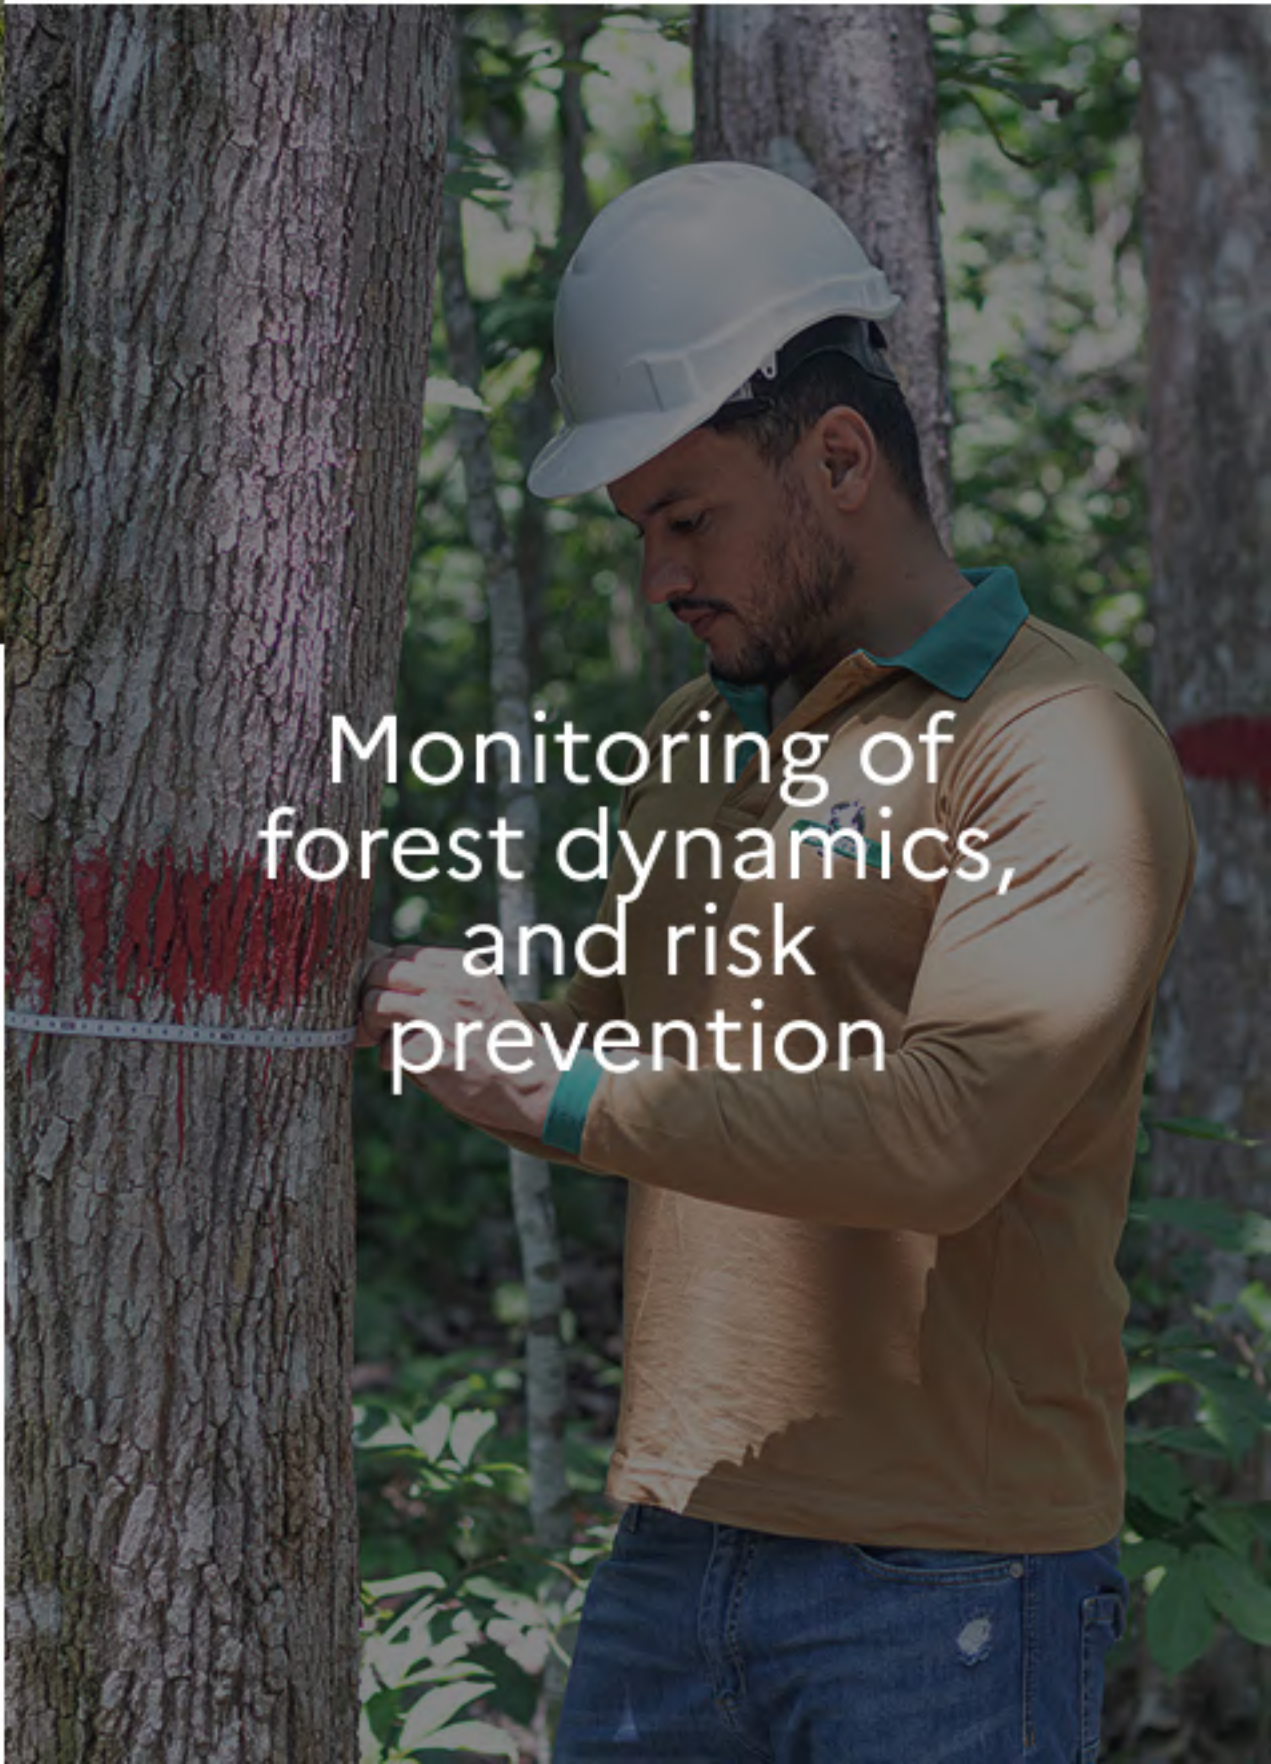

Landscape
and ecosystem
restoration

Regenerative
agriculture and
eco-construction

Water resource
protection

Monitoring of
forest dynamics,
and risk
prevention

A full range
of solutions
and services.
Tailored
to your
ambitions

Full range
solutions
services.

itions

1

Premium carbon
credit purchase

Invest with confidence in certified forest carbon credits labeled “**ONF Group Premium Quality**,” ensuring transparent actions with high environmental impact.

2 Tailored global strategic support

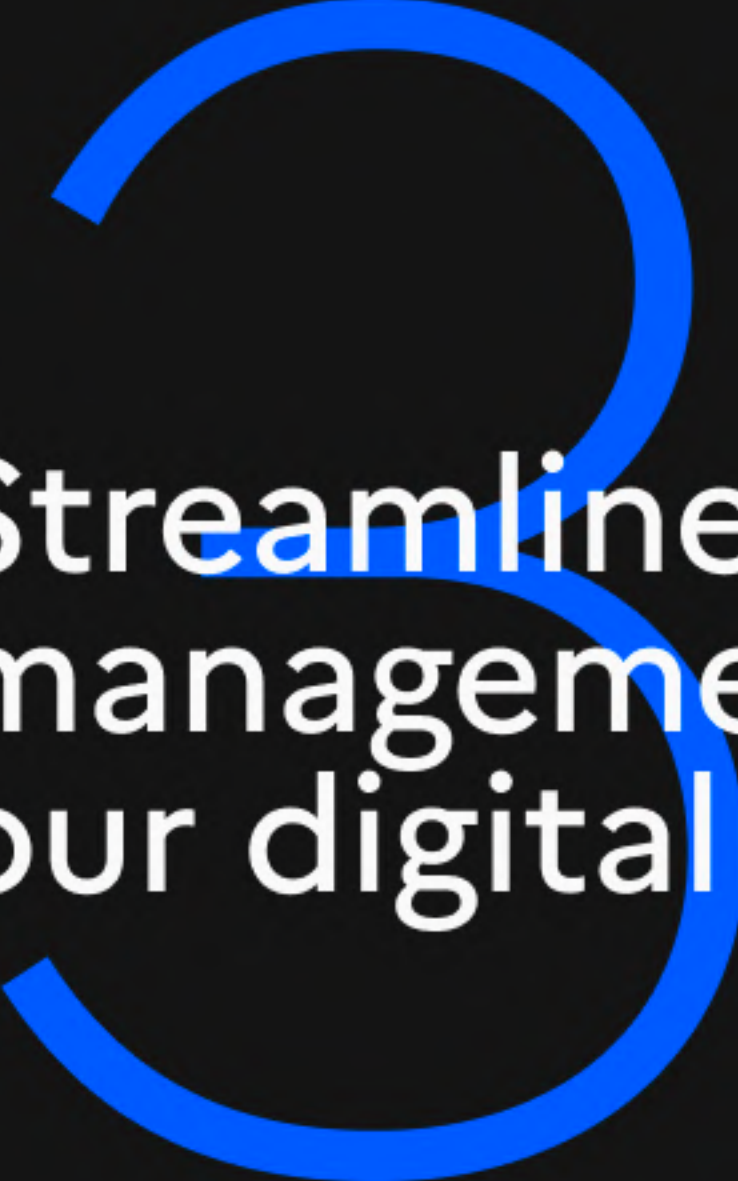

Commit to a long-term forest project:

→ From design to certification, we ensure the success of your project across the entire value chain.

Streamlined project
management with
our digital solutions

Your forest projects are
monitored and optimized through
our FORLAND digital platform

Your forest projects are
monitored and managed through
our **FORLAND** digital platform

Forland Plantation to optimize reforestation
operations and monitor project biomass.

Your forest projects are
monitored and managed through
our **FORLAND** digital platform

Forland Carbon to manage, certify,
and enhance your carbon strategy with
high-integrity carbon credits.

4 Project management assistance

Secure your forest projects
by relying on our field expertise and
advanced technological capabilities.

5 Specialized training

Strengthen your
team's skills and
autonomy through
our dedicated
training program

nization

Whatever our level of
involvement in your project,
ONF INTERNATIONAL guarantees:

**A clear and credible
climate strategy aligned
with the most demanding
international standards.**

A real and lasting positive impact
through high-value forest and
territorial projects

→ Combining carbon sequestration,
biodiversity protection, and support
for local communities.

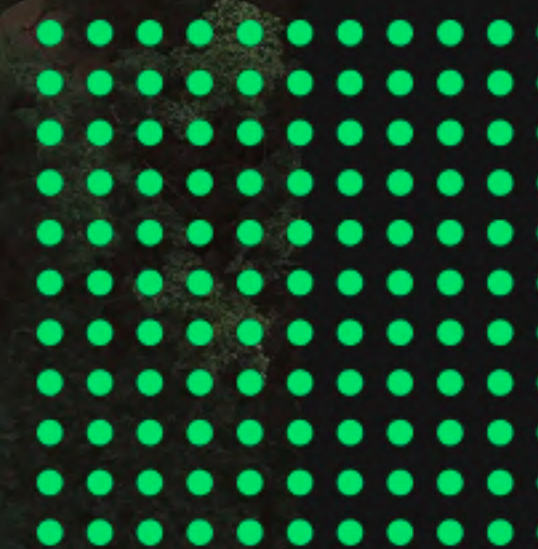

Strong recognition of your commitments among your stakeholders

→ Backed by the expertise of a leading
reference organization.

Here, the forest speaks. And we listen.

Around the world, **ONF International** designs and implements **robust and replicable projects** for companies and governments, generating measurable impacts recognized internationally.

Brazil : Fazenda São Nicolau

Reforestation in the
Brazilian Amazon's

climate trajectory

Develop credible
carbon offset projects

Give concrete and
measurable impact to
your commitments

A photograph of two workers in a field with large trees. One worker is in the foreground, wearing a blue shirt, light-colored pants, and black rubber boots, using a tool to work the soil. Another worker is visible in the background, wearing a wide-brimmed hat and a light-colored shirt. The scene is set in a field with large trees and a text overlay.

*Let's build ambitious and sustainable solutions
together for the climate, biodiversity, and your
environmental performance.*

Here, the forest speaks.
And we listen.
